

Case Study

Client

Geotech designs, develops and manufactures instrumentation systems to meet the growing needs of the Civil Engineering industry. Geotech's core products form a wide range of instrumentation aimed specifically at the Geotechnical section of the civil engineering market.

Resources used

- Cross functional training programme based on best practice problem solving tools and methods
- Provided coaching and support for Project Leaders and team members
- Provided specialist training and support to key individuals through a funded programme

Approach

Capella helped Geotech to develop a comprehensive Business Transformation Programme (BTP), structured to include relevant training, projects and management reporting processes.

Methodology

Results

- Inventory **reduced** by **£400k** during the course of the programme and controls developed
- New product knowledge acquired relevant to achieving **UKAS approval**
- Significant personal development accompanied by an **improvement** in company **capability**
- Greatly **improved** cross functional **team working**
- **Reductions** in Service Department **Re-Work Times**

“ During this period of economic recession, the cost of our training programme is not a problem – but rather the solution to our future. ”

Steve Billingham - Managing Director
