

Capella JJS Lean Programme

Background

Capella has been delivering Lean training, to a large number of clients, for 11 years. The specific requirements were captured from this client and a bespoke package was created to meet their specific needs.

Requirements

Train a mixed group of delegates in Lean techniques including; History of Lean Plan, Do, Check, Act, Problem Recognition Project set-up & Control, Workplace Organisation - 5S, 8 Wastes, Launching a Lean Project, Process Mapping Value Stream Mapping, Root Cause Analysis, Problem Solving Techniques Andon, Total Performance Maintenance & Line Balancing

- Use Lean techniques, case studies and practical exercises to support underpinning knowledge
- Understand business needs and support the successful completion of a number of improvement projects from their business

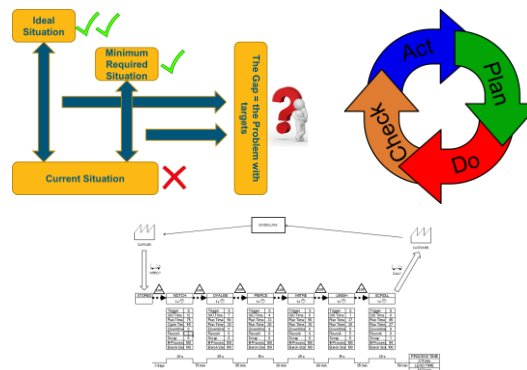

Capella Input

Delivered training in Lean techniques to two groups from UK and Czech Republic

Provided an engaging and interactive training experience using simulation techniques and exercises

Provided bespoke project support and coaching to ensure the successful transfer of new skills into the delivery of business benefits on a number of selected projects

Provided on-site and remote support for the duration of the programme outside of programmed

Results

The knowledge element of the programme was completed successfully for all delegates

Completion of projects which delivered multiple benefits for the businesses

5 WHY – New Job Audit Not Completed

“ Using the exercises to reinforce our learning was invaluable in ensuring that that I now use these tools day to day ”

“ People around me have been interested to see how these techniques have helped us to improve the set-up of current and new projects ”
