

Capella Open Network Green Belt Programme 2018

Information

Capella has been delivering Six Sigma training, to a large number of clients, for 12 years. Programmes run annually for open groups of delegates from mixed industries throughout the country and Europe.

Requirements

- Train a mixed group of delegates in the Six Sigma methodology and Green Belt level tools in a 5-day single-week programme
- Use Six Sigma techniques and case studies to support underpinning knowledge
- Support the successful completion of improvement projects across their businesses

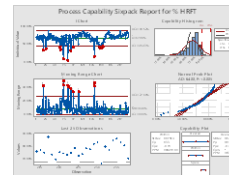

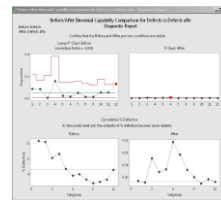

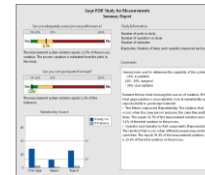

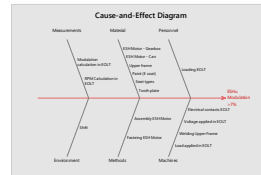

Capella Input

Delivered 5 days continuous training in the Six Sigma tool set within the DMAIC methodology

Provided an engaging and interactive training experience using simulation techniques and specialist statistical software

Coordinated on site face to face and webex coaching sessions post training, for the duration of the programme

On hand support and guidance in the use of Minitab software in support of improvement project completion

Results

100% completion of all training elements of the programme for all delegates

70% right-first-time completion of improvement projects for the one week programme, minor correction required by remainder.

Comprehensive use of statistical analysis tools across all delegates

100% Positive feedback for programme structure.

“ Capella to me is like a "friendly face who is always there to help". Specifically, I really liked the coaching & training style - very practical, easy to understand and to the point. I read SPCs & 6 Sigma so many times in my academic career (Engineering & MBA) but its practical application always remained a mystery to me. Thanks for finally cracking it for me. This is one of the many examples. Thumbs up Capella !!
