

Case Study

Client

Valeo is an automotive supplier and partner to automakers worldwide. As a technology company, they design innovative solutions for smart mobility, with a particular focus on intuitive driving and reducing CO₂ emissions. The Group also provides and distributes spare parts for automakers and independent aftermarket operators.

Resources used

- A tailored Six Sigma training programme at Angers site in France
- Provided guidance on completion of Jaguar Land Rover reporting template and problem solving
- Provided an engaging and interactive training experience using simulation activities and specialist statistical software

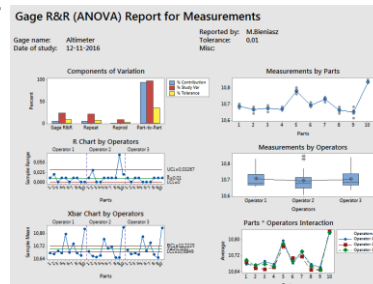

Approach

Capella worked with Valeo to tailor and deliver a bespoke in-house Six Sigma Green Belt programme to multiple employees from a number of European Plants in order to enhance and further develop the business's problem solving capability in the format recognised by Jaguar Land Rover.

Methodology

Tailored Six Sigma training and remote coaching support and assessment ensured delegates successfully transferred new skills into business benefit and robust reports.

Results

- Projects completed in Support and Technical environments, leading to **improved KPIs** for a range of products and processes
- **Bottom line savings** generated through robust problem resolution
- All delegates achieved '**distinction**' for exam results

“ In my opinion Capella is a worth-recommending training company, with a professional trainer, who is experienced and has proper knowledge. ”
