

Lean Overview Training at Exmac Automation

Company Information:

Exmac Automation is part of the MacDonald Humfrey group of companies. They are market leaders in the supply of automated materials handling equipment to the automotive, aerospace, white goods, warehouse & distribution, nuclear, pharmaceutical and food & beverage industries.

Requirement:

To introduce the concept of Continuous Improvement to a small group of employees and then underpin the values of '5S and Waste Reduction'

Capella's Input:

Development and delivery of Lean Overview Training over a 3 month period

Onsite and continued-remote coaching support to ensure that the improvement activities led to:

- Defined targets
- Robust analysis of Current State
- Design options for improved Future State
- Implementation and validation of Improvements

“ I have worked with Capella previously and yet again they have delivered a step change improvement in our capabilities as a company enabling us to move forward by delivering and underpinning improvement techniques in a fast moving fast changing environment ”

Daniel Jarvis
Manufacturing Manager

Results:

5 Certified Lean Practitioners

Improved efficiency through:

- Application of 5S to improve organisation of equipment, instruments, and supplies in the machine shop
- A clear visual management system
- Improved layout and flow of material in the machine shop
- A structured audit process and supporting procedure to monitor and sustain the 5S across the business
