

SMT Developments Six Sigma Training

Company Information

SMT is a family business specialising in PCB prototyping and assembly. They are one of the UK's leading electronics manufacturers serving a range of sectors including Automotive, Medical, Mining and Telecommunications.

Requirements

- Improve the Problem Solving skills of key personnel
- Ensure improved and sustained operating efficiency allowing the potential for growth

Capella's Input

- 8 days of Six Sigma Green Belt Training.
- Onsite and continuous remote coaching to support delivery of business benefits.

“

I really enjoyed the Green Belt and Capella has made the value of Six Sigma crystal clear to me.

”

Results

1 certified Six Sigma Green Belt

Improved efficiency through:

- Reducing the amount of Feeder shortages
- Increasing the availability of Matrix Trays
- Reducing set up delays by improving component loading methods and working with suppliers to reduce late deliveries

Improved monitoring and measurement

“

I hope to be able to do more courses with Capella, you are head and shoulders above the rest!

”
